In Brief

Applications for Innovative Product Award now open

TORONTO

Innovative Product Award applications can now be submitted for a chance to win at the 2018 Buildings Show being held Nov. 28 to 30 at the Metro Toronto Convention Centre.

The Innovative Product Award (formerly known as TIPTA) was established in 1994 by the Toronto Construction Association (TCA) and is open to any supplier who can demonstrate the development, and/or the use of innovative technologies in their respective industries, states a release. The first place winner receives:

- the Innovative Product Award, including a \$5,000 cheque;
- a press release announcing the first place winner will be issued to local media;
- a TCA membership valid for one year;
- a full page advertisement and classified listing in the association's annual publication of the Construction Book;
- an electronic listing in the TCA's online directory;
- a press release announcing the winner in the TCA's monthly e-connect newsletter; and
- four tickets to the TCA's Christmas Luncheon.

The deadline for submissions is Monday, Nov. 12 at 11:59 p.m. Extensions will not be granted. The application form is available at www.thebuildingshow.com.

'Seize the moment,' invest in Canada: Champagne

ANGELA GISMONDI
STAFF WRITER

The future is bright for public-private partnerships (P3s) in Canada, the country's minister of infrastructure and communities told delegates at a national P3 conference.

"Seize the moment. There has never been a better time to invest in Canada," said Francois-Philippe Champagne at the 26th annual Canadian Council for Public-Private Partnerships conference in Toronto.

"I want to emphasize the magnitude of the opportunity before you. I don't think there has been a better time for you to take a moment to look at what we're doing in Canada and see what role you are going to play in making a difference. This is a chance for the public sector and the Canadian infrastructure industry to forge game-changing partnerships, invest in projects and demonstrate leadership in the global infrastructure landscape."

Champagne discussed the role of P3s in the government's Investing in Canada Plan and pointed out that \$180 billion is only the federal portion and with provincial and municipal invest-

LINDSEY COLE

Canada's Minister of Infrastructure and Communities Francois-Philippe Champagne was the opening keynote speaker for day one of the 26th Annual Canadian Council for Public-Private Partnerships conference in Toronto. He told audience members that the federal government intends to expand the spectrum of opportunities for the public sector to attract private-sector investment.

ments it will probably be closer to \$300 billion.

"We want to expand with you the spectrum of opportunities. We want to attract more investment from within Canada and

abroad because we know and you know that first class infrastructure is the best way to attract talent and investments," Champagne said. "Our success requires technology, innovation and partner-

ship with the private sector. That's why I encourage you...to help us build the infrastructure of the 21st century, infrastructure that is modern, resilient and green."

Ontario construction sector faces tough challenges ahead: panel

IAN HARVEY
CORRESPONDENT

The new Ontario government is hitting the pause button on spending and that suggests not all 29 Infrastructure Ontario (IO) projects now in the pipe will get the green light, a seminar of Young Construction Leaders (YCL) was told in Toronto.

John McKendrick, executive vice-president of IO, was part of the Toronto Construction Association panel at the Globe and Mail Centre, discussing the present and future of construction.

The event kicked off with a quick horizon

check on the industry with panellists Geoff Smith, president and CEO of EllisDon, and Jennifer Coco, CEO of the Coco Group, a family-owned and operating asphalt roadbuilding and paving company.

The consensus was the industry is at the top end of a busy cycle and will slow down in the year ahead.

"Under the previous government we were pushed to throw out as much work as possible and probably contributed to the overheating of the market, which was a problem," McKendrick said. "We need to get back to a steady pipeline. Big projects take two years of planning, so this

is a good time to go back and ask what changes we can make to make the process better."

Moreover, he said, IO recognizes what the industry and organizations like the Residential Construction Council of Ontario have been saying about the need to streamline the approvals process.

He said IO wants to be less prescriptive and standardize proposal requests as well as change the way things are specified to allow contractors more scope to innovate and reduce costs.

"We're trying to move to electronic bidding, as opposed to all the physical stuff," he said.

44th annual Heritage Toronto Awards celebrate city-building contributions

TORONTO
More than 500 guests from Toronto's city-building community gathered recently as the winners of the 2018 Heritage Toronto Awards were announced.

In its 44th year, the Heritage Toronto Awards recognize extraordinary contributions to the conservation and celebration of Toronto's heritage, states a release issued by the City of Toronto.

The awards were handed out at The Carlu in Toronto to seven winners out of 53 nominees in five categories: Community Heritage; Public History; Historical Writing; Short Publication; Historical Writing: Book; and Architectural Conservation and Craftsmanship.

Each category was independently judged by a jury of experts. The winners include:

SCOTT NORSWORTHY

The WE Global Learning Centre received one of two Architectural Conservation and Craftsmanship Awards at the Toronto Heritage Awards. The award was presented for the adaptive reuse of a rare Chicago School-style building, originally designed by Toronto architect Henry Simpson. The building was restored to its original brick and wood facade with stone masonry detailing.

ARCHITECTURAL CONSERVATION AND CRAFTSMANSHIP AWARDS

The Keg Mansion for its restoration of a central decorative feature to this former Massey family home. The building owner is The Keg Steakhouse and Bar and craftspeople are Vitreous Glassworks.

The WE Global Learning Centre for the adaptive reuse of a rare Chicago School-style building, originally designed by Toronto architect Henry Simpson. The building owner is Jeff McLeod, director of WE GLC; the architectural firms are Philip Goldsmith Heritage Architect, Kohn Partnership Architects Inc.; and the craftspeople are TriAxis Construction Ltd.

THE COMMUNITY HERITAGE AWARD

Ireland Park Foundation for its work commemorating the history of Irish people in Canada.

The jury gave an honourable mention to Rise UP! A Feminist Archive, a digital archive providing online access to Canadian feminist materials from the 1970s to the 1990s.

THE MEMBERS' CHOICE AWARD

The Beach and East Toronto Historical Society for preserving and promoting the social, cultural, and architectural history of Toronto's east-end.

THE PUBLIC HISTORY AWARD

The Chinese Canadian Archive for its work documenting Chinese Canadian history in the GTA from 1878 to the present.

The jury gave an honourable mention to the Toronto Ward Museum's Not Just Numbers: Representation in the Canadian Census, an innovative program that uses a game format to help participants engage with primary sources and identify the biases and stereotyping that exist in historical records.

THE HISTORICAL WRITING, SHORT PUBLICATIONS AWARD

Massey Hall – Shine a Light, a pamphlet exploring the history of the music venue's first 100 years — from the operatic performances of Enrico Caruso to the Greatest Jazz Concert Ever. The author is Michael Barclay with contributors Mary Dickie and Jamie Bradburn. The publisher is Massey Hall.

The jury gave an honourable mention to Maple Leaf Forever, a souvenir publication on the enduring symbolic appeal of the maple leaf to Canadian identity.

THE HISTORICAL WRITING, BOOK AWARD

The Many Rooms of This House: Diversity in Toronto's Places of Worship Since 1840, a nuanced analysis of how the growing wealth of the city led to competitive congregations, larger and more ornate places of worship, and eventually the transformation of this once overwhelmingly Protestant city into a symbol of diversity, the release indicates. The author is Roberto Perin and the publisher is the University of Toronto Press.

The jury gave an honourable mention to Any Other Way: How Toronto Got Queer, a richly illustrated history of how individuals and community networks transformed Toronto from a conservative place into a city that has led the way in queer activism.

At the ceremony, the Heritage Toronto board also presented a Special Achievement Award to the Toronto Public Library for its continuing investment in landmark architecture and new facilities that have transformed Toronto's built fabric and enriched community life, the release states. A Volunteer Service Award was presented to Jason Lee for his service as a dedicated tour leader, and advocate for the Korean-Canadian community.

TRACY HANES

The new \$49-million Shorelines Casino Peterborough opened in mid-October with 500 slot machines, 22 table games, a 230-seat buffet restaurant and a 40-seat a la carte restaurant.

\$49-million Shorelines Casino Peterborough officially opens

TRACY HANES
CORRESPONDENT

Slot machines are ringing and roulette wheels spinning at the new Shorelines Casino Peterborough.

The \$49-million facility at Peterborough, Ont.'s southern gateway opened in mid-October with 500 slot machines, 22 table games, a 230-seat buffet restaurant and a 40-seat a la carte restaurant.

Matheson Constructors provided project management for the 50,000-square-foot casino, built and operated by B.C.-based Great Canadian Gaming Corp.

Matheson also handled construction management for the 47,000-square-foot Shorelines Casino Belleville that opened in January 2017 with 400 slot machines and 22 game tables.

Despite bad weather and strong opposition from city residents, construction on Shorelines Casino Peterborough started Sept. 13, 2017 and its doors opened 13 months later.

The casino, designed by Chris Dikeakos Architects Inc., has an entrance framed by two opposing curved roofs supported on dual steel columns.

It is expected to contribute to the city's local economic development and provide entertainment and employment to local residents and visitors.

The full-service casino

is open 24 hours a day with some of the latest slot machines, live dealer table games such as blackjack, roulette and baccarat, a Racebook and a live entertainment area. The Windward Restaurant and Lounge serves up casual fare and The Buffet has daily themed buffets.

Bryan Buchanan, general manager at the Peterborough casino, says the recent opening day was exciting for the 300 team members — 180 who are new — who were eager to showcase the new facility.

The adjacent Peterborough Visitors' Centre was demolished in May to create casino parking. Roshan Holdings owned the land and allowed the city to use the building rent-free for a decade. The Visitors' Centre is now in downtown Peterborough in the VentureNorth building on George Street.

Adjacent to Shorelines Casino Peterborough, Roshan Holdings is building a 100-room Hampton Inn and Suites by Hilton that is under construction and expected to open in May 2019.

It will include an indoor saltwater pool, fitness centre, meeting facilities and business centre, according to Roshan's director of development Jordan Struk.

The developers have owned the land since 2005 and were drawn to the area because they owned cottages

nearby, said Struk. Roshan also owns a Home2 Suites by Hilton, a 100-room hotel in Milton that opened in 2016.

The new Peterborough hotel will address a shortage of accommodation facilities in the city, which are in short supply during major events, and accommodate visitors who want to enjoy the games, restaurants and entertainment at the new casino, Struk added.

The Great Canadian Gaming Corp. planned to remove the games at the nearby Shorelines Slots at Kawartha Downs race track once the Peterborough casino opened.

However, after objections from the Service Employees International Union Local 2, representing Shorelines' food and beverage workers at Kawartha, plans changed.

On Oct. 12, 2018, the Government of Ontario announced it would support the horse racing industry and some slot machines will remain at Kawartha Downs and Ajax Downs.

The same day the Peterborough casino opened, workers at Kawartha Downs found they were locked out of their workplace.

However, according to an Ontario Lottery and Gaming statement, the Shorelines Slots at Kawartha Downs were to relaunch by the end of October after renovations to allow the operation to continue with 150 of its previous 500 slot machines.

Companies need to evolve to new technologies, a changing landscape

Continued from Pg. 1

Coco said the time and resources required for approvals in Ontario add cost and it's the government that ends up paying for it.

"Some 80 per cent of our work is for governments," she said, noting contractors are getting conflicting stories. "For example, if a bald eagle is not an endangered species in the United States anymore why is it still endangered in Canada?"

"We find it very challenging in terms of the number of people we have to work with because the legislation is not standardized. One inspector in one region says one thing and another says something different.

"To get environmental approvals in Ontario we have to walk in with all kinds of binders with all the consultants signing off. I have to get 100 permits in Ontario but in Manitoba and Saskatchewan it's four. The red tape delays the process and is not helping the customer."

McKendrick said he's sympathetic to the issue because it's unpredictable and that's something the construction industry does not like.

"You have a small group of individuals who decide what is at risk and they won't give you an answer until you start and then they change their minds," he said. "We need to change this. The industry needs warning time and you can't just throw something at them in the middle of a project."

Smith, who took over EllisDon from his father Don, the company founder, now runs an employee-owned \$3.5-billion-a-year operation with 15 national and international offices. He said those in the industry should be careful to consolidate their positions and not make rash decisions for a few thousand a year more.

More competition is coming in from global conglomerate firms and many have acquired local contracting companies.

"We don't want to get eaten for lunch, we want to eat lunch," he said.

While he said he was "plenty scared" of the big international contractors he thinks Canada can compete.

"If you want to get into the middle of a shootout between EllisDon and PCL, you better have your act together. One of the worst projects we have worked on was a multi-national which couldn't deliver. They came to Canada, they didn't understand the market. They should have done the research before they came."

Jennifer Coco

John McKendrick

Companies also need to evolve, he said, staying ahead of their clients and the competition by leveraging information technology (IT).

"I had a conversation with a client who told me to 'stay in the box,'" Smith said. "But you have to be out front and sometimes that means you're standing alone. It's not always comfortable because it involves risk. But you'll figure it out."

Also, he said, the change towards more integration of IT in construction has to be driven from the top down.

While the construction industry is generally slow to adopt new technologies, it will have to learn to adopt them because it is inevitable, the panel agreed.

The trend towards electronic bidding and cost analysis means it's time to get on board the data train.

"We're paving the Gardiner and instead of surveyors we have drones," said Coco. "That's just the way it is now."

Also, she said, data points are a more efficient way to manage because it can track productivity and results throughout the enterprise.

With the baby boomer retirement wave, contractors may be ever more reliant on technology. The shortage of truck drivers, Coco said, may prompt the adoption of self-driving vehicles too quickly with dire consequences.

"We need more labourers," she said. "I was talking to Labourers' International Union of North America president Joe Mancinelli about this. He said Local 183 has 55,000 members and they still need more."

The issues facing the construction industry in the future may be more focused on attracting employees to the trades and construction management along with diversity and gender balance, the panel suggested.

EllisDon is reviewing its hiring and promotion policies, Smith said, because while an internal survey found employees weren't overly concerned with gender and ethnic balance in a practical sense, there was a perception that white males tended to get promoted more quickly and paid more.

It's the perception that is the issue, he said.

"I wish there were more women in our sector," added Coco. "When I graduated from my MBA program there were three women. That same class is now 50-50. The education stream has changed but its not quite there yet in the workplace."

Market access, labour mobility make Canada 'obvious place to invest,' says Champagne

Continued from Pg. 1

He noted that Canada is the only G7 country with a free trade agreement with all other G7 nations and that Canada will also soon have preferential market access to about 1.5 billion consumers around the world through the Comprehensive Economic and Trade Agreement, Comprehensive and Progressive Agreement for Trans-Pacific Partnership and the USMCA.

"Canada is an ideal location for global firms like you to operate because it is not just about stability, predictability and rule of law. I think you would agree with me that in this

world today market access is key and labour mobility through these agreements is making Canada the obvious place to invest," said Champagne.

The Canada Infrastructure Bank, a new tool to finance infrastructure in the country, is designed to expand the opportunities from the public sector to attract private sector investment from within Canada and globally, Champagne said. That includes transit systems, hospitals, bridges and all season roads in the north.

"We put the infrastructure bank in to do more, faster and better for Canadians," he stated. "The P3 model was an important building

block in the Canada Infrastructure Bank. It allows private sector partners to be brought in earlier from the planning stage...so we can better design projects and hopefully use technology to provide better assets for the people. Our role is to develop the pipeline of projects and bring investors and the public sector together to have appropriate risk-sharing in building these projects."

Following his presentation, the minister was asked about the government's involvement in the Sidewalk Labs project in Toronto, a partnership between Waterfront Toronto and Alphabet's Sidewalk

Labs to create a new type of mixed-use community.

"This is probably the most technologically advanced project that is going on, at least in North America," said Champagne. "On one hand, we make sure we support a project that is trying to reinvent cities the way we know them. On the other hand, we are the defender of public interest so we have to make sure whatever is done there is done with all the safeguards that people would expect.

"We will continue to be engaged with them into the future because I think this can inform the way we

design, build and maintain cities in the future."

He also spoke about Montreal's Réseau express métropolitain project (REM), a 67-kilometre, light rail, high-frequency network, the first project announced by the Canada Infrastructure Bank.

"REM is a good example where you have an asset which is revenue generating, which was a natural for us to invest in because you have a stream of revenue for the long-term, you have a willing partner, a technology partner and a builder and you have private capital," said Champagne.

How to use the Building Reports

The Building Reports section of Daily Commercial News includes Prebid, Out for Tender, Bid Results and Start reports. Projects located throughout Ontario are reported.

Pre-Bid

The Daily Commercial News Pre-Bid section includes reports on projects planned for future construction — from the "Conceptual" stage (prior to architect selection) through architect selection, design, final planning and preconstruction-negotiated, updated as significant changes occur. Select jobs to follow, contact the owner or architect.

Out for Tender

The Daily Commercial News Out for Tender section includes reports on projects currently being tendered, the initial list of bidders, bid date changes. Pick jobs in your area of interest.

Bid Results

The Daily Commercial News Bid Results section includes reports on projects announcing results after the receipt of tenders. Reports include the names and bid prices of low bidders, and the name of the successful contractor.

Starts

The Daily Commercial News Starts section includes reports from building permits. Look for jobs you have been following or new jobs in your area of interest.

Regions included:

Central Ontario

Includes census divisions of Durham, York, Toronto, Peel, Halton, Dufferin, and Simcoe

Eastern Ontario

Includes census divisions of Northumberland, Prince Edward, Dundas-Stormont-Glengarry, Prescott-Russell, Lanark, Leeds-Grenville, Frontenac, Lennox-Addington, Hastings, Peterborough, Kawartha Lakes, Haliburton, Renfrew, Muskoka, Nipissing, Parry Sound, and Ottawa

Western Ontario

Includes census divisions of Niagara, Hamilton, Waterloo, Haldimand-Norfolk, Brant, Oxford, Perth, Elgin, Chatham-Kent, Essex, Lambton, Middlesex, Huron, Grey-Bruce, and Wellington

Northern Ontario

Includes census divisions of Kenora, Rainy River, Thunder Bay, Cochrane, Algoma, Sudbury, Timiskaming, and Manitoulin

Building Reports can also be found by using CMD Leads online at <https://app.cmdgroup.com>. Need Help? Contact 1-800-959-0502.

The project reports on the following pages are compiled by ConstructConnect's team of researchers. Project inquiry line: 905-752-5540.

Architect: Kirkor Architects & Planners, Manuel Carvalho, 20 Martin Ross Ave, North York ON M3J 2K8 416-665-6060 x365 Fax: 416-665-1234

Demolition, addition, site work and new construction for a mixed-use development in North York. Design plans call for the construction of a 19-story apartment building, a seven-story and nine-story addition to both sides of an existing 19-story building and a new two-story amenity center building. Plans include 636,168 square feet, 652 residential units, ground floor retail space, and underground parking. This project is on hold. The project was resubmitted to city council for rezoning summer 2017. The project was forwarded to the Ontario Municipal Board (OMB) spring, 2018. A hearing with the Local Planning Appeal Tribunal was held October 30, 2018. Schedules for working drawings, tender for general contractor and construction are undetermined pending approvals.

Construction of a new Pavilion facility of approximately 12,000 square feet of usable space, based upon a footprint of approximately 9,000 sq ft. Main level includes large and small activity and meeting (or multipurpose) rooms, and including support spaces such as offices, washrooms, storage, service, and circulation spaces. Upper level includes meeting room, office, washrooms, and exterior deck with significant views of immediate environment and prominent skyline horizon. New facility shall require completely new servicing, utilities, rainwater management, sewage provision, and all services required for a new building. Note that the park, as reclaimed shoreline property, has remote services access and will require detailed attention to services provision and access. Existing parking lot shall provide facility parking, however new parking lot and adjacent walkway and ponds lighting shall be included in this scope, and some readjustment of parking or walkway organization may be included. The project will also include rehabilitation of approximately 250 sf of existing storage facility to support conversion to leasable space for future concession rental. Working drawings are complete. Tender for general contractor is anticipated in 2019. Tender and construction will proceed subject to capital budget approval spring, 2019.

Construction start 17-Jun-19; Completion by 28-Oct-19;

EVO CONDOS + TOWNS ID: 3681060 \$71,200,000 est SCARBOROUGH, Toronto, ON

2180 Lawrence Avenue E, at Birchmount Rd., Scarborough, M1R 3A3 DESIGN

Owner: Lalu Canada, Shumu Jagirdar, 102-50 Mint-horn Blvd, Thornhill ON L3T 7X8 905-881-4401

Architect: Kohn Partnership Architects, Harry Kohn, 116 Spadina Ave, Toronto ON M5V 2K6 416-703-6700 Fax: 416-703-6704

Construction of a residential development at the northeast corner of Lawrence and Birchmount in Scarborough. The scope of work proposed includes five structures; a 21-storey with a 7-storey podium stretching to the eastern border of the site. The mechanical penthouse and podium would be topped by a green roof. The building is proposed to contain 160 units, with 45 one-bedrooms, 96 two-bedrooms and 19 three-bedrooms or more. The ground floor has 559 m of divided retail space, with an adjacent indoor and fenced outdoor amenity space. A total of 342 m of indoor amenity space and 320 m of outdoor amenity space is proposed, including an 8th floor terrace overlooking Lawrence. A proposed 7-storey mid-rise along Birchmount Road will contain 64 units, each with a private balcony or terrace. Of these, 2 are bachelor units, 32 are one-bedrooms, 23 are two-bedrooms, 7 are three-bedrooms. A 131 m indoor amenity space will be available, with an additional 104 m of outdoor space proposed, including a fenced ground floor space and rooftop terrace. A 4 level underground garage connects this and the 21-storey building, containing 322 spaces, with 256 of these for residents, 43 visitor spaces and 23 for retail and

other purposes. 224 bicycle storage spaces are also included in the garage, 197 of these for long-term storage and the remaining 27 as short-term spaces. Three blocks of 3.5-storey town homes would border Dulverton Road to the north and the east property line of the site. Project planning is underway. City council rezoning approvals are in place; site plan is being finalized. Working drawings will begin January, 2019. A construction Manager will be secured through private negotiations and will be awarded spring, 2019. Pending sales, construction may proceed in 2019/2020.

ME Eng: Novatrend Engineering Ltd., 175 West Beaver Creek Road, Richmond Hill ON L4B 3M1 905-882-5445 Fax: 905-882-5447

Construction of a 48 and a 49 storey building at the southwest corner of Widmer St and Adelaide St W. The 48-storey building will include 353 hotel suites over the first 28 floors with 225 condominium suites above and the 49-storey 438-suite condonly tower rising behind Victorian homes to the south. The two structures will rise from a 10-storey podium that will house retail and amenity space. Six blocks of townhouses will be developed at grade. Interiors will feature finishes and fixtures like quartz kitchen countertops and stainless steel, and fully-integrated kitchen appliances. Four finish package selection boards offer the range of customization options available to buyers. Sales and marketing are underway. Working drawings began early summer, 2018 and are expected to be completed September, 2018. Submissions for building permit submissions will be made fall 2018. Tender and construction are expected late 2018/early 2019.

CITY OF BARRIE MULTI-MODAL ACTIVE TRANSPORTATION MASTER PLAN

ID: 4454187 \$50,000,000 est

BARRIE, Simcoe, ON

Various locations, Barrie, L4M 4T5

CONCEPTUAL

Owner: City of Barrie, Tom Reeve, 70 Collier St, Barrie ON L4M 4T5 705-726-4242 Fax: 705-739-4237

Consult: WSP Canada - Barrie, 561 Bryne Drive, Unit C and D, Barrie ON L4N 9Y3 705-735-9771

Infrastructure and transportation improvements including bridge, and road upgrades and various municipal facilities. Projects will be identified as those that increase active transportation and transit use, improve options to keep Barrie moving during planned growth, and developing comprehensive, environmentally sound solutions. The city has initiated an update to the Multi-Modal Active Transportation Master Plan (MMATMP) to assess future transportation needs to support growth to the 2041 horizon year based on the Provincial Growth Plan for the Greater Golden Horseshoe. The consultant is undertaking completion of a Municipal Class EA, Master Planning Process that will review existing conditions; identify transportation improvements, including road widening and active transportation/transit improvements, to accommodate growth; identify, assess alternatives based on modal split and identify a preferred alternative solution; and develop a long-range implementation plan to 2041. The study area encompasses all of Barrie. Completion is expected Q1 2019 at which point the study will be forwarded to city council for consideration. Projects will be identified based on funding approval. The contracting method is undetermined.

Redevelopment of a 43-hectare waterfront park. The site is located at the mouth of Mimico Creek, south of Park Lawn Road and Marine Parade Drive. Humber Bay Park West and Humber Bay Park East comprise the two park sections, divided by the mouth of the creek. The project includes architectural improvements, improvements to footbridges, and bridge over Mimico Creek. The architect has completed a Master plan for the site May 2017 including park design, phasing plan and park master plan, including landscape design. Public information sessions took place through 2016 and early 2017. Public comment and the Master Plan have been forwarded to council for approval. The Master Plan is being finalized with Consultants and will be incorporated into phase one, which is followed separately as the Humber bay Park East building. Further projects will be identified and detailed design, tender and construction schedules determined pending capital funding approval.

Construction of a new Pavilion facility of approximately 12,000 square feet of usable space, based upon a footprint of approximately 9,000 sq ft. Main level includes large and small activity and meeting (or multipurpose) rooms, and including support spaces such as offices, washrooms, storage, service, and circulation spaces. Upper level includes meeting room, office, washrooms, and exterior deck with significant views of immediate environment and prominent skyline horizon. New facility shall require completely new servicing, utilities, rainwater management, sewage provision, and all services required for a new building. Note that the park, as reclaimed shoreline property, has remote services access and will require detailed attention to services provision and access. Existing parking lot shall provide facility parking, however new parking lot and adjacent walkway and ponds lighting shall be included in this scope, and some readjustment of parking or walkway organization may be included. The project will also include rehabilitation of approximately 250 sf of existing storage facility to support conversion to leasable space for future concession rental. Working drawings are complete. Tender for general contractor is anticipated in 2019. Tender and construction will proceed subject to capital budget approval spring, 2019.

CITY OF BARRIE MULTI-MODAL ACTIVE TRANSPORTATION MASTER PLAN

ID: 4454187 \$50,000,000 est

BARRIE, Simcoe, ON

Various locations, Barrie, L4M 4T5

CONCEPTUAL

Owner: City of Barrie, Tom Reeve, 70 Collier St, Barrie ON L4M 4T5 705-726-4242 Fax: 705-739-4237

Consult: WSP Canada - Barrie, 561 Bryne Drive, Unit C and D, Barrie ON L4N 9Y3 705-735-9771

Infrastructure and transportation improvements including bridge, and road upgrades and various municipal facilities. Projects will be identified as those that increase active transportation and transit use, improve options to keep Barrie moving during planned growth, and developing comprehensive, environmentally sound solutions. The city has initiated an update to the Multi-Modal Active Transportation Master Plan (MMATMP) to assess future transportation needs to support growth to the 2041 horizon year based on the Provincial Growth Plan for the Greater Golden Horseshoe. The consultant is undertaking completion of a Municipal Class EA, Master Planning Process that will review existing conditions; identify transportation improvements, including road widening and active transportation/transit improvements, to accommodate growth; identify, assess alternatives based on modal split and identify a preferred alternative solution; and develop a long-range implementation plan to 2041. The study area encompasses all of Barrie. Completion is expected Q1 2019 at which point the study will be forwarded to city council for consideration. Projects will be identified based on funding approval. The contracting method is undetermined.

Repro: Biddingo, 1210 Sheppard Ave, East, Suite 305, North York ON M2K 1E3
This Request for Proposals (RFP) is an invitation by the Toronto Community Housing Corporation (herein after referred to as TCHC) to prequalified proponents to submit nonbinding offers for the Concrete Formwork. Leslie Nymark is currently a 100% rent-gear-to income community comprised of 10 blocks of townhouses on approximately 6.5 acres of land. The planning approvals required in order to commence the revitalization of Leslie Nymark have been received. The revitalization includes the replacement of 115 rental units on site plus an additional 498 units of residential market condominiums. The project for the purposes of this RFP includes 1 new midrise building. For the purposes of this project Deltera Contracting Inc is acting as Construction Manager on behalf of Toronto Community Housing and will be administering the RFP process.

Repro: Merx, 6 Antares Dr, Nepean ON K2E 8A9 800-964-6379 Fax: 888-235-5800

For the supply and install a new high cycle, rapid door at 40 College Street, Toronto Police Headquarters, Grenville street parking entrance. The objective of this project is to replace the existing high cycle, rapid overhead door that has come to the end of its expected lifecycle. This project includes all labour, equipment, and material for the supply and installation of a new high cycle, rapid overhead door to replace the existing door, including controls and safety sensors etc. The existing door has an average of sixty thousand (60,000) cycles per year; however the replacement door must meet or exceed these minimum requirements. The successful Contractor is responsible for coordination of all the work including removal and disposal of the existing door. Bidder must register with MERX in order to have the ability to formally complete and uploaded a Bid submission.

Construction start 03-Dec-18; Completion by 31-Dec-18;

Bids to Role: Reprographer;

The Work includes but is not limited to the following:
1. Project startup including mobilization to the Site. Development, implementation, and maintenance of a Site specific Health and Safety Plan. 2. Provision and maintenance of temporary facilities and controls required to execute the work. 3. Compressor Building: a. Replacement of glycol heating system at south end mechanical room. b. Installation of new glycol piping from the north end of the compressor building to the WGB building. c. Install new 50mm WGB pilot line natural gas supply header from the natural gas header on the east exterior wall of the gas compressor building to the WGB building. New pilot line shall be surface routed as shown on drawings. Disconnect and abandon the existing buried WGB pilot line natural gas piping at the natural gas header at the east exterior wall of the compressor building. The existing pilot line shall remain active until the third and final flare is isolated for removal. d. Installation of an oil water separator on a new platform in the compressor building basement connected to the ground level floor drains. Waste oil from the separator shall be sent to the waste oil tank on the main floor and water from the separator shall be sent to the nearby sump pit. 4. WGB Building: a. Sequential replacement of each WGB system including supporting mechanical and controls systems while maintaining two operational WGBs at all time. b. Demolition and removal of existing WGBs including WGB controls and associated support systems and metal framed caged enclosures at each flare base. c. Replacement of guardrail and lighting fixtures on the WGB building roof. d. Concrete repairs to the roof slab of the WGB building. e. Replacement of WGB concrete housekeeping pads. f. Placement of concrete topping on the entire exposed roof of the WGB building. g. Enclosing of the WGB building including, but not limited to, the addition of masonry infill walls, windows, doors, wall liner, heating and ventilation systems. h. Replacement of the WGB building access ramp, walkways and fencing around the building. i. Installation of Building Automation System (BAS) with integration

to plant SCADA. j. Integration of the WGB operations and controls to emergency power fed by existing UPS including the installation of a new feeder from the Head House black start generator to the UPS in the digester electrical room and installation of an automatic transfer switch. k. Replacement of main WGB digester gas and sour gas supply piping, isolation valves, flame arresters, pressure regulators and appurtenances. l. Upgrades of the WGB system to satisfy TSSA based on latest Code for Digester Gas and Landfill Gas Installations - CSA B149.6-15. m. Testing, training and commissioning of the new/upgraded WGBs operational and control systems. 5. Site Work: a. Installation of a pre-fabricated building for housing new WGB control panels, and electrical systems including installation of a foundation. b. Installation of a new electrical duct bank and manhole from the digester 7 & 8 sludge gallery to the WGB building. c. Installation of cable tray and pipe supports with concrete foundation from the WGB control building to the existing gas compressor building. d. Installation of new retaining walls, concrete walkways, curbs, site grading and restoration. 6. CONTRACTOR shall remove items as identified in the Contract Documents for removal or demolition, and CITY shall retain the first right of refusal on all equipment to be removed and/or demolished. 7. Testing of WGBs prior to return to service. In accordance with TSSA and CSA B149.6-15, CONTRACTOR shall include TSSA inspection and test witnessing fees. 8. Comply with requirements for provisional items in accordance with Section 5A Specific Conditions of Contract. 9. Other miscellaneous works as outlined in the Contract Documents. 10. Demobilization and closeout. More information can be obtained at: <https://tinyurl.com/yc3ogo2a> Owner does not track plan takers and/or interested bidders. Bids will be accepted only from those firms that were pre-qualified under the Request for Pre-Qualification (RTP) No. 3907-18-5025. For construction services for the Clark Centre for the Arts Addition and Renovation to Building 191 at Guild Park and Gardens, 191/201 Guildwood Parkway. Renovation (6000 sq ft) and addition (5000 sq ft) to existing building including but not limited to: Demolition, Abatement, Landscaping, Civil Work, Structural, New Mechanical and Electrical Systems. Architectural: -Renovations include creating 2 new studio spaces on the existing ground and second floors to include a new main stair and elevator, universal and public washrooms, general purpose room, office and reception area, new exit stair to the 2nd floor and associated circulation gallery and amenities. -Renovations include insulating the existing exterior walls and cleaning/repairing/restoring the existing exterior walls. -Abatement of asbestos containing textured coatings and door and window caulking. -Demolition of major building components is required to accommodate the proposed changes. -The addition includes a new 2 story high lobby and vestibule. The addition also includes a 315 s.m. third floor structure skewed above the existing building while extending over the lobby on steel columns. The third floor includes 2 studio spaces a shared wet room, washrooms and associated circulation and amenities. -Exterior finishes - tra-

ditional stucco clad addition and cleaning of existing stucco -Interior finishes - Polished Concrete, Carpet, Resilient Sheet flooring, Gypsum Board, Ceramic Tile, Acoustic Ceiling panels etc. Landscape Work: -Development of vehicle and pedestrian access and parking from the existing parking lot to the Clark Centre for the Arts -Development of the area around the building including hard and soft landscaping -Tree removals and Tree protection with Arborist oversight. Native tree, shrub and ground cover planting. -Various hard paving surfaces both permeable and non-permeable. -Drop off and service zones, barrier free ramps, curbs, bike stands and bollards -Amenities including lighting, park furniture, wayfinding, and recycling. -Installation of green roof on lower roof. Civil Work: -The Building has new domestic water service (to be relocated), new sanitary service (to be connected). New hydro service to be provided. Relocation of gas service to be ordered. -Installation of a fire main and fire hydrant -Surface Drainage in the loop road -Storm Water Management: surface drainage to maintain percentage of permeable and non-permeable surfaces -Erosion and Sediment Control Structural Work: -The 3rd floor addition is structurally independent from the original building. The new floor and roof will stand on a series of steel columns. The new block stairways and elevator shaft will also take some of the load. Along with the north wall they will also act as bracing. -The ground floor slab will be replaced. -Existing steel web joists at the 2nd floor and roof will be demolished where the new shafts penetrate the existing construction and will be replaced by new ones. Mechanical Work: -New domestic and sanitary system -The whole building sprinkler system -HVAC, 3 gas fired packaged roof-top units, Make up Air unit, Exhaust Fans -Exposed spiral ductwork Electrical Work: -New exterior transformer with disconnect -New electrical supply to all equipment and lights in the building -New fire alarm system, elevator, telecommunications system, security system and emergency power. More information can be obtained at: <https://tinyurl.com/y96pk2rz> *This project is being bid by invitation only. If you have been contacted by the owner to bid on this project as a general contractor, and would like to be listed below, please notify our editorial staff.

EMERGENCY RELIEF/ASSESSMENT OF BLOCKED DRAIN AND SEWER SERVICE CONNECTION ID: 4414767 \$2,696,247 est

TORONTO, Toronto, ON

various locations, Toronto, M5H 2N2

BID RESULTS Solicitation #: 271-2018

Owner: City of Toronto, 416 Clark St., Toronto OH 43964 740-537-3743

Owner: City of Toronto - Purchasing and Materials Management, 100 Queen St. W., Toronto ON M5H 2N2 416-338-0889 Fax: 416-338-0685

Con Admin: City of Toronto - Purchasing and Materials Management, Marie Reid, 100 Queen St. W., Toronto ON M5H 2N2 416-397-5187 Fax: 416-397-7779

For Emergency Relief/Assessment of Blocked Drain & Sewer Service Connection Trenchless Rehabilitation by CIPP for Toronto Water Operation and Maintenance Section - Various Locations in Toronto (City Wide). Under the terms of this Contract, the Contractor agrees to furnish the necessary labour material and equipment to respond and relief/assess blocked drains on emergency basis and to restore the structural integrity of sewer service connections and/or pipes through the installation of the CIPP and to use Toronto Water's Contract Management System (CMS) which is a web based application that will be used for contract administration purposes. Restoration of structural integrity means that the rehabilitated sewer shall be capable of resisting for a 50-year life all loads and pressures to which the sewer is currently subject. Toronto Water staff will respond to blocked drain service requests to attempt relieving blocked drain. If they are not able to relieve the blocked drain, they will obtain the following information before mobilizing the contractor: - Toronto Water contact information for the Emergency (phone/email) - Street address and District - Nearest intersection - Name of resident - Phone number/email of resident - Description of Problem - (is there an active backup in progress or just a plugged drain) - What work was attempted to relieve the blockage - Location of the Cleanout (if any) and if it's accessible More information can be obtained at: <https://tinyurl.com/ycajyjmo> Owner does not track plan takers and/or interested bidders. If you are an interested contractor and wish to be listed as a bidder, please email research.canada@constructconnect.com

Construction of a modern three-storey office building, keeping some of the historic design elements of the current historical structure, the Ugandan High Commission will occupy the site that was home to former prime minister Lester B. Pearson between 1955 and 1958. Features such as the flat roof and an octagonal windows would be incorporated into the new building. The owner's agent is seeking approval for an application to permit the demolition of the existing vacant building. The application was sent back to city heritage staff early 2018. A revised

NATIONAL LIBRARY & PUBLIC ARCHIVES- REPLACE DAMAGED FRESH AIR DAMPERS LEVEL B1

ID: 4453482 **\$100,000 est**
OTTAWA, Ottawa, ON
395 Wellington St., Ottawa, K1A 0M2
TENDERS DUE, 16-Nov-18 at 2:00 PM ET. Solicitation #: GOC372667-CT
Agent: Brookfield Global Integrated Solutions, Erin Griffiths, 300 Sparks Street, 4th floor, Ottawa ON K1R 7S3 613-254-5497
Repro: Merx, 6 Antares Dr, Nepean ON K2E 8A9 800-964-6379 Fax: 888-235-5800
Replace existing dampers at the B1 Level wood working shop associated with the two air handling units located within the Library & Archives Wood Working Shop. Install new actuators and controls as required and ensure the entire system is calibrated and communicating correctly with the buildings existing BAS system. In addition to the new damper, the existing AHUs would be replaced with two new AHUs. In the new AHUs the cooling coil would be located downstream of the heating coil, eliminating the need to manually isolate and drain the cooling coils in the winter as the air passing the cooling coil will never be below freezing. The control valves for the cooling would be replaced, as the existing valves appear to be at the end of their lifecycle. In addition, control valves would be added the heating coil to eliminate the need for human intervention during seasonal changeover. To properly control the space temperature, all of the control devices would be added to the BAS. With the system on the BAS the temperature control will be fully automated, and heating or cooling will be provided based on the space temperature trends. There are many pieces of equipment within the space that have a dedicated exhaust system for dust extraction. With the installation of a new AHU, the entire area can be analyzed to ensure that an appropriate amount of outdoor/make-up air is being provided to the space to replace the exhausted air. The new AHUs will be sized to be able to handle the additional outdoor air drawn into the space to replace the exhausted air.

OPP DHQ Electrical & Fire Alarm System (FAS) Renewal and OPP Detachment Fire Alarm System (FAS) Renewal. OPP DHQ Electrical & FAS Renewal: The intent of this project is to renew the Electrical distribution equipment and the fire alarm system installed at the Peterborough OPP DHQ building. Built in 1965, the electrical service distribution (400A) equipment is considered to be original to the buildings construction. Installed in 2000, the Fire Alarm System (FAS) is a Mircom Series 1000, with fire alarm panel single stage connected to flow switch, heat & smoke detectors, audible alarms, and supervisory valves. The project requires removal and replacement / implementation of the Fire Alarm System and Electrical System as per current OFC, OBC, ESA inspections and Ministry specifications. OPP Detachment FAS Renewal: The intent of this project is to renew the Fire Alarm System (FAS) installed at the Peterborough OPP detachment. The Fire Alarm panel, a Mircom FA-1008 with required expander boards, has been recently installed as part of another project. The new fire alarm panel, single stage system with pull stations, heat detectors, smoke detectors, flow switches, supervisory valves are all included in the scope of this project. This project requires removal and replacement / implementation of the Designed system as per current OFC and OBC requirements as well as all required inspections/Ministry requirements. Owner requires that all interested parties sign a Non-Discloser Agreement (NDA) in order to access the plans and specs for this project. To obtain the NDA for this project refer to document details in this report.

Architect: MMMC Architects Inc - Brantford, Anthony Bateson, 127 Brant Ave, Brantford ON N3T 3H5 519-756-6331 x218 Fax: 519-756-7631

The project consists of the staged removal and replacement of existing damaged and failing stucco plaster on lath facade at an existing Long Term Care Facility. The subject area is an older wing of the facility, primary cladding replacement is at areas of wall which lack a roof overhang. Where a roof overhang is present, work on the facade consists of the removal and replacement of existing painted cedar battens, and addition of new membrane flashings for better water shedding performance. Con Admin: Niagara Falls Bridge Commission, Charmaine Scollon, 5365 Military Road, Elmira NY 14902 716-285-6322 x4141 Fax: 716-205-0699

The Niagara Falls Bridge Commission seeks qualified contractors to perform epoxy terrazzo flooring rehabilitation work at the Queenston Canada Plaza, the project involves phased work in the Canada Customs and NFBC Toll Buildings. The work must be coordinated to maintain bridge operations at all times. All Contractors must be pre-qualified to submit tenders directly to the Commission; if your firm is not currently pre-qualified to complete work for the Commission and you wish to submit a tender for this project you must submit a completed prequalification form no later than September 28, 2018; visit NiagaraFallsBridges.com, look under Services/Construction/Contractor Prequalification; follow instructions to submit a prequalification form. Once approved firms generally remain qualified to perform work for the Commission for a period of 3 years from the date of approval. It is anticipated that an Invitation to Tender for the terrazzo flooring rehabilitation work will be issued in October 2018; firms pre-qualified to perform work for the Commission will receive a notification when the Invitation to Tender for the Project is issued.

Construction start 02-Jan-19; Completion by 01-Apr-19;

Bids to Role: Owner;

Visit www.dcnonl.com/certificates-and-notices to search all Certificates of Substantial Performance, Certificates of Completion of Subcontract, Notices of Intention to Register a Condominium, Notices of Non-Payment of Holdback, and Notices of Termination.

NOTICE: Effective July 1, 2018, amendments to the Construction Act are reflected in the Certificates and Notices section of Daily Commercial News. These amendments required minor changes to the forms for Certificate of Substantial Performance (now called Form 9), Certificate of Completion of Subcontract (now called Form 10), and Notice of Intention to Register a Condominium (now called Form 11). The amendments also required publishing of two new notices: Notice of Non-Payment of Holdback using Form 6, and Notice of Termination using Form 8. To learn more about the amendments, visit www.dcnonl.com/construction-act.

Visit www.dcnonl.com/submit-manual to download Forms 6, 8, 9, 10 and 11.

To publish certificates and notices, email dcncertificates@constructconnect.com or fax 1-800-947-7966. For more information call 905-752-5482.

Those placing notices are responsible for ensuring Daily Commercial News receives, by fax or otherwise, all necessary information and for reviewing Daily Commercial News upon publication for any errors or omissions and advising Daily Commercial News at once. Daily Commercial News will make good any errors or omissions attributable to it in the next available issue, but will otherwise bear no liability whatsoever for any failure to publish any notice, however caused and even if arising from Daily Commercial News' own negligence.
