During the course of construction of this project, personnel from our firm visited the site in order to carry out general review of the Work. On the basis of our review, we have determined that the construction has been carried out to Substantial Completion in general conformity with the Interior Design documents which formed the basis for the issuance of the building permit. The majority of the construction is complete, with the exception of some minor deficiencies and some finish material applications, that do not affect the ability to occupy the space.
